

Want to help bees, butterflies and other pollinating insects in your local area?

The insects that pollinate around 80% of our food crops are at risk from loss of habitat, amongst a cocktail of other human-induced threats - but you can help!

1. Make a Pollinator Promise (website below)
2. Plant pollinator friendly plants
3. Spread the word #PolliPromise

www.bit.ly/polli-promise

Thanks to St Alban's Primary School in Havant for pioneering the campaign as part of the Polli:Nation programme led by Learning through Landscapes
